Full Stack Developer Intern

Bhopal, India

- Built a full-stack **Blog Management System** with Node.js, Express.js, and MongoDB following **Controller–Service–Repository** architecture for clean separation of concerns.
- Implemented **role-based access control (RBAC)** and **JWT authentication**, supporting draft/published workflows, pagination, and full-text search across blog content.
- Designed a **Saved Blog feature** using MongoDB references, compound indexing, and populate() for optimized data retrieval at scale.
- Built **aggregation pipelines** for top-viewed blog analytics and dynamic filtering with query performance optimization to reduce response latency.
- Integrated an **Email Queue system** for automated notifications on blog publication, improving async reliability and decoupling notification logic.
- Deployed production apps to cloud platforms, managed **CI/CD workflows**, and resolved CORS, routing, and API issues in live environments.

Tech Stack: TypeScript, Node.js, Express.js, Next.js, MongoDB, Redis, AWS S3, BullMQ, Joi, Multer, Brevo, REST APIs, Git & GitHub

Projects

BlogPost – Full-Stack Blog Management Platform

[GitHub](#)

Next.js | React | TanStack Query | Node.js | Express.js | MongoDB

- Built a full-stack blog platform with **Next.js (App Router)** and **React**, featuring server-side rendering, dynamic routing, and optimised page performance.
- Integrated **TanStack Query** for async server-state management, enabling efficient data fetching, caching, background sync, and paginated feed rendering.
- Engineered a **Node.js / Express.js REST API** with JWT auth, RBAC, draft/publish workflows, full-text search, and MongoDB aggregation-powered analytics.

Trakies – Trek Management & Check-in System

[GitHub](#)

Node.js | Express.js | MongoDB | Middlewares | React Native | Expo

- Built **RESTful APIs with custom middleware** for secure access control and robust protection, handling **100,000+ requests/second** with consistent reliability.
- Designed **end-to-end QR code check-in/check-out logic** across multiple trek checkpoints, including **offline-capable** location-based tracking.
- Developed **dynamic booking, user allocation, and accommodation management** with personalised booking views and smooth application flow via React Native + Expo.
